Session types

4 types of sessions

We are offering four different types of sessions this year on our virtual conference platform, depending on the session topic. Each individual webinar will be classified according to the following types:

Option 1 - HANDS ON LAB

This session is brought to you as a hands on exercise and is limited to 30 participants. Session preregistration is mandatory and follows a 'first come, first serve' approach. You will be guided how to access your personal training environment at the beginning of the session. You have to join the session on time to take your spot. Otherwise, you will be deregistered from the session to make room for others.

Option 2 - DEEP DIVE SESSION

This session is a deep dive walk-thru tutorial. You can follow the speakers and interact through the Q&A window with all experts in attendance. There are no limitations to join, however please register for the webinar if you plan to attend, so we can provide specific last minute information via email.

Option 3 - DEEP DIVE + SELF STUDY

This session is a combination of a deep dive walk-thru and an offline self study exercise that you can take after the event. In the first part you will follow the speakers and interact through the Q&A window with all experts in attendance. There are no limitations to join, however please register prior to the event so you receive all the necessary instructions and session updates. The instructor will guide you how to access the self study environments after their session independently at a time of your convenience.

Option 4 - INTERACTIVE SESSION

This session is an interactive session. You can follow the speakers and interact through headset with all experts in attendance. The session is limited to 30 participants. A preregistration is mandatory and follows a 'first come, first served' approach. You have to join the session on time to take your spot. Otherwise, you will be deregistered from the session to make room for others.
